Phicom Pty Ltd advanced users

Who is Phicom Pty Ltd

Phicom is an Australian company committed to excellence in the field of hardened wireless communications products, specializing in applications supporting the needs of recreational users, professional services and security providers.

We strive to achieve excellence through a corporate policy of innovation and environmentally sensitive design.

This policy incorporates essential feedback from dedicated people interested in furthering Australian technology in the world market place.

Advanced Users

Advanced Users are select groups working with Phicom to evaluate leading edge products, that are not and may not become available to the general public.

These groups work closely with Phicom trialling products such as new Tactical Microphones as used by the special services, headsets and a range of diverse accessories, as well as Special Software Upgrades exclusive to the group. These Special Software Upgrades will incorporate feedback from the groups where they require specialist functions.

PHICOM and the stylised Phi Logo are trademark of Phicom Pty Ltd, all other product or services names are property of their respective owners.

participate in leading technology getting the edge and keeping it

Advanced User Benefits

Once the initial purchase has been made, the Advance users will for the lifetime of their participation in the group, receive free software upgrades, new product at wholesale prices and specialised support, and in some cases, free new products for evaluation and trials. The advanced users will also receive specialised technical support to assist them in their unique communications needs.

Who are the Advanced Users

Advanced users are accepted from a range of diverse groups, these groups include:

- Motorcyclists
- Rally Car Drivers
- Jet Boat Racers and Jetski Enthusiasts
- Climbers and Skiers
- Emergency Service Providers
- Specialist Security Providers

The feedback from these groups will be directly communicated to the engineering group and used to refine the product.

Who can be an Advanced User

A group that will collectively purchase more than 20 XSports 2400 units or 10 XSports 2400 link packs.

contact us network and grow

Phicom is an Australian company committed to the Australian industry and supporting local development. Phicom owns all of its proprietary intellectual property and has ongoing interests in developing growing and sustainable relationships with Australian industry partners and key developers.

Phicom sees its product development as an organic process incorporating feedback from its user groups through its implementation of an early adopters program for the technology, and the creation of specialised user groups.
